reverse side chainmail

Sheet made up of small domed octagonal brass pieces joined together by rings according to a “spider weave” pattern. The use of brass, a noble and resistant base, allows for a multitude of décors and surface treatments.

Truly a metallic textile, the Bubblescale mesh is a flowing, supple and sensual material that can take on all shapes. Its fine quality, blended with its domed shape, reacts particularly well to the light, thus creating an outstanding drape effect. According to the effect desired, it can also be used on the reverse side.

Bubblescale is produced in standard sheets. The fastening tabs can be opened and closed for purposes of using several sheets. It can easily be cut with a pair of scissors. On request, the parts can be made to fit your dimensions.

Material Brass
 Max. size without connection (l x w) 457 x 600 mm
